PROJECTS

Hotel listing and review platform (completed) [Github](#) | [Live](#)

- developed a fullstack hotel booking and listing platform using Node.js, Express.js, MongoDB and EJS.
- implemented user authentication, authorization, hotel listing management, and review/rating functionality.
- Built server-side rendered pages with EJS to improve SEO and reduce client side complexity.

Real-Time Video calling & chat Application (In progress)

- Building a real time-time communication platform using WebRTC, Socket.IO, Node.js, and Express.js.
- Developing real-time messaging, user presence indicators and connection management.
- Handling session creation, room management and ICE candidate exchange for reliable media connections.

EXPERIENCE

Freelance Full-stack-Developer | 2026

- Built and deployed a coaching institute website with admin pannel for a paying client.
- Delivered features based on client requirements

ACHIEVEMENTS

- Secured 1st position in web dev competetion in college
- solved 70+ data structures and algorithms problems
